Image Clean

👉 How Image clean works ?

- When we delete Image of product or category it has been deleted from the database but in folder its exist. So its the use server storage and after sometimes server was full because of the unusable products and category images. So the image clean module is help to remove unusable images.
- When you delete category images then it will show into category image clean grid . For the go to category image clean grid follow below steps Catalog >> Category Image Clean

The screenshot shows the Magento Admin interface. On the left, the 'Catalog' sidebar is expanded, with 'Category Image Clean' selected. A red arrow points from the 'Category Image Clean' link in the sidebar to the 'Category Image Clean' link in the main content area. Another red arrow points from the 'Catalog' link in the sidebar to the 'Catalog' header in the main content area. The main content area displays a 'Category Image Clean' grid with a 'Reload Data' button. Below the grid, there is a summary section with a table showing Revenue (\$0.00), Tax (\$0.00), Shipping (\$0.00), and Quantity (0). At the bottom, there are tabs for 'Bestsellers', 'Most Viewed Products', 'New Customers', and 'Customers'.

Revenue	Tax	Shipping	Quantity
\$0.00	\$0.00	\$0.00	0
